# Portfolio

Avely Voore

Design

- Simple and clean
- Took inspiration from my own style. As it's supposed to represent me I thought it would be appropriate.
- Accessibility   -large fonts

-semantic tags

-alt text for images

-simple colours with good contrast ratio

Colour Theme

Primary -> black

Secondary -> warm white

Accent -> light green

Sitemap

- All pages are interlinked, except for blogpost, which is only linked with 'blog' page
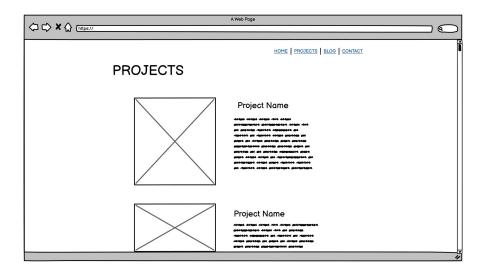

Home

Home

- Layout: grid
- Navigation bar: hover effect with accent colour, adds interest
- About me + image: which makes it personal and hopefully sparks an interest
- Projects: header + clickable pictures
- Footer: with icons that on a click open my github, linkedin and codepen accounts, make it easier for potential employers to see my work and contact me
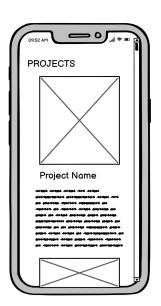

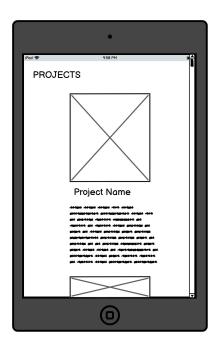

Navigation bar

- Flexbox
- Has a hover effect

Projects

Projects

- Part of homepage
- Layout: flexbox
- Heading
- 'Cards' that have a picture of a website and clicking on it will take you there
- 'Cards' have a hover effect as seen

  on the screenshot. Shows my

  skills and makes website more
  interesting.

Blog

Blog

- Layout: flexbox
- Navigation bar: hover effect with accent colour, adds interest
- Cards with title of the blogpost, introduction, date and button
- All cards link to same file
- Cards have hover effect
- Button has hover effect
- Footer

Blogpost
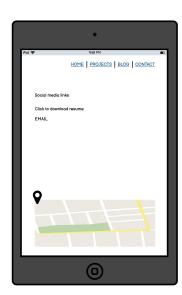

Blogpost

- Back button
- Heading
- Date
- Author
- Article with image

- Footer

Development process

- Biggest challenge was projects component and design (it's harder than I thought)

- Favorite part was seeing it all come together, having fun with designing and improving my skills. I learned a lot about flexbox and grid, but there is still lots more to learn.
